Kidney care often means several medicines and supplements at once. Writing them all in one place keeps the day straight so nothing is missed or doubled. Fill in the doses from your own vet's instructions.

## GOLDEN RULES

General principles, not doses. Confirm any that apply to your pet with your vet.

- Phosphate binders only work when given with food, ideally mixed through the meal.
- Keep to the same times each day so levels stay steady.
- Never double up a missed dose without asking your vet first.
- Some tablets are best given apart from others, so ask your vet about timing if your pet is on several at once.
- Measure liquids carefully with the syringe provided.
